

EUGENE L. BUCHANAN

Technical Support Specialist — Healthcare Technology

L Apple Valley, CA **T** +1 (909) 545 5384 **M** eugene@serviceofothers.org **G** github.com/eugeneb50

Professional Summary

Technical support specialist and senior software engineer with 25+ years of experience bridging customers and engineering teams. Proven track record investigating complex technical issues across REST APIs, SQL databases, and distributed systems. Skilled at translating clinical and operational requirements into actionable technical guidance. Comfortable working with clinicians, developers, and practice managers to resolve high-impact issues under pressure.

Experience

Senior Quality Assurance Engineer / Test Automation Lead / Product Owner, Integrations

Dec 2020 – Aug 2025

Knowledgecity LLC · Remote

- On average actively working 10–15 concurrent tickets across integration, backend, API, database, and frontend surfaces using SQL queries, Elastic logs, and application code review.
- Used co-pilot assisted code reading to understand expected behavior and identify root causes of complex cross-service failures.
- Built regression test suites with health dashboards and alert systems covering complex deployment scenarios.
- Authored internal runbooks and knowledge base articles for common failure patterns, reducing repeat escalations.
- Managed customer integrations via REST APIs, SFTP, SAML, and OAuth — debugging authentication issues, data discrepancies, and payload mismatches.
- Communicated technical findings to both engineering teams and non-technical stakeholders, translating database anomalies and API errors into clear remediation steps.
- Coordinated with engineering on bug escalations with evidence-backed write-ups that required minimal back-and-forth.

Business Consultant — Foremost Senior Center

2013 – 2016

Foremost Organization · Hesperia, CA

- Evaluated, selected, and troubleshoot medical billing software for senior center operations.
- Investigated software billing discrepancies, claims submission workflows, and eligibility verification processes.
- Served as technical liaison between clinical staff and software vendors, translating operational requirements into system configurations.
- Documented troubleshooting procedures and trained staff on billing software workflows, reducing repeat support requests.

Senior Software Engineer / Technical Support & Presales Engineering

1999 – 2001

RealNetworks · Seattle, WA

- Provided global presales engineering and technical support for a streaming media platform.
- Investigated customer-reported issues across server infrastructure, mobile platforms, and network configurations.
- Trained new hires on technical escalation procedures and debugging methodologies.

Technical Support Agent II

1996

Keene Inc. · Seattle, WA

- Provided Tier 2 technical support for Windows 95/NT systems across enterprise clients.
- Managed multiple concurrent customer issues, triaging by urgency and impact.
- Documented resolutions in an internal knowledge base for team reference.

Senior Software Test Engineer

1997 – 1999

Microsoft · Redmond, WA

- White box testing for Windows 98/NT and Windows Media Server.
- Built automated regression suites and defect tracking workflows.
- Collaborated with development teams to reproduce and resolve complex bugs.

Education & Certifications

- California Notary Commission
- Toastmasters International
- Associate Degree, Victor Valley College
- High School Diploma, Lucerne Valley High School

Key Strengths

- **Systematic investigation.** Check logs, query data, and read code before forming hypotheses.
- **Customer empathy.** Equally comfortable investigating a database anomaly and walking a stakeholder through a workflow change.
- **Technical communication.** Experienced explaining complex concepts to both developers and non-technical users.
- **Healthcare-adjacent experience.** Understanding of compliance, operational workflows, and mission-critical system reliability.
- **AI-assisted workflow.** Active contributor to ZeroClaw agentic AI infrastructure with practical experience building and debugging AI-powered tooling.
