Re: Quality Engineer — 25 Years of Automation, GenAI Quality, Measurable Value

Dear Inspire11 Hiring Team,

Inspire11 helps clients ship better software, faster, without breaking what works — exactly where I operate. With 25 years as an SDET, Test Automation Lead, and Product Owner, I turn quality from a checkpoint into measurable confidence.

25 yrs Software / QA	A2A Swarms agentic multiplexer	MCP CLI Tooling Rust-based	RAG + guardrails AI quality
--------------------------------	--	--------------------------------------	---------------------------------------

GenAI quality — verifiable evidence

My differentiator: hands-on AI systems work — I helped develop a support chatbot with RAG context retrieval and guardrails (plus SOC 2 compliance work), and I contribute to ZeroClaw Labs' zeroclaw gateway below (clickable to verify):

Contribution	What I validated	Verify
Context-window bar — 9 providers	context_window as single source of truth; doctor command, gateway refresh endpoint, done-frame + ContextBar + CLI summary.	PR #7946 · MERGED
Live provider identity + cost ledger	Per-attempt usage_by_provider ledger with scalar cost; stream-to-non-stream recovery; fixes pre-output fallback #10736.	PR #8966 · OPEN
Agent lifecycle observer (herdr)	idle/working/blocked/released states via JSON-RPC over UDS; bounded I/O, shutdown drain.	PR #8337 · CLOSED*
RAG chatbot + guardrails (Knowledgicity)	Helped develop support chatbot with RAG retrieval + guardrails; SOC 2 research and implementation.	Shipped, in production

*#8337 closed unmerged (superseded by #10269); also reviewed #8672 (auth/permissions/isolation).

Enterprise automation that maps to your squads

- **Built the automation team from zero** — hired and trained engineers; end-to-end regression suite with health dashboards and alerting; white-box testing for CI/CD on Apache/REST/SQL/AWS (React).
- **Product Owner, Integrations** — managed dev team (design + test), backlog and KPIs; shipped SAP, Oracle, Workday, Coursera, UKG, Zoom via SAML, OAuth, SFTP, APIs, webhooks, SCORM, LTI; quality across frontend/backend/mobile/API/security/performance; Qase, Jira, Confluence (transferable to TestRail/Zephyr).

Cypress Selenium Postman JUnit Apache REST SQL AWS React SAP Oracle Workday SAML OAuth SFTP
SCORM LTI Qase Jira TestRail-ready Zephyr-ready

Plainly on gaps: Associate degree (Victor Valley) + 25 yrs experience; Qase/Jira → TestRail/Zephyr in days — same traceability and release-readiness principles.

Practical, transparent, outcome-oriented – aligned with your Eleven Principles: coverage that matters, automation that compounds, releases backed by evidence. I'd welcome the chance to help your clients ship AI they can trust.

Best regards,

Eugene L. Buchanan
